# WorldVisitz Mobile Application Agile Delivery Launch

REVIEW

HISTORY

## Meets Specifications

Hello Davide Nastri,

Congratulations on completing this project successfully.

Your work was amazing and I have really enjoyed reviewing your work, how you have explained your work, especially accurately describing the agile framework and explained why agile will be more effective for application delivery at Worldvisitz than Worldvisitz and also identifying the various business challenges Worldvisitz are facing.

To say that I enjoyed going through your work would be an understatement.

You obviously put a lot of work into this and I am glad that it paid off.

Keep up the good work! 🦊

Be Udacious! 🦊 and Keep it going like this!

Congratulations and wish you all the best with the rest of the nanodegree.

Finally, I would like to share with you some great articles for continuous learning:

1. [Different Agile Methodologies: Find Which One Fits Best Your Needs](#)
2. [Agile Project Management For Dummies Cheat Sheet](#)
3. [The Ultimate Agile Dictionary](#)

Don't forget to rate my work as project reviewer! Your detailed feedback is very helpful and appreciated - thank you!

Stay safe 😊

Selling the Agile Framework to Leadership

✓

The Agile Foundations presentation makes an effective case for adopting the Agile framework:

- The Agile framework is described accurately
- The Agile Manifesto is described and at least two reasons are given for following the Agile Manifesto.
- The differences between Waterfall and Agile are listed.

The presentation contains no more than 20 slides.

## Great Start 👍

- ✓ You have clearly and correctly described Agile framework.
- ✓ The Agile Manifesto is described with it's core values and 12 principles.
- ✓ The differences between Waterfall and Agile are listed.

Useful Reading Materials

1. [Manifesto for Agile Software Development](#)
2. [Comprehensive Guide to the Agile Manifesto](#)
3. [Why are Agile Manifesto Principles so important?](#)

✓

The Agile Foundations presentation makes a business case for using Agile at WorldVisitz by:

- including specific examples of why Agile would be more effective for improving application delivery at WorldVisitz than using Waterfall
- incorporating at least two Agile principles

## Well done 🙌

- ✓ You have accurately demonstrated a business case for using Agile for WorldVisitz by including specific examples of why Agile would be more effective for improving application delivery at WorldVisitz than using Waterfall and incorporating at least two Agile principles.

Useful Reading Materials

1. [Why are Agile Manifesto Principles so important?](#)

✓

The Agile Foundations presentation describes the key features of all three frameworks and the differences between them.

A specific framework is recommended for WorldVisitz. The recommendation:

- identifies and describes at least three specific business challenges is WorldVisitz is facing
- explains how the specific Agile framework can be used to solve the identified problems

## Awesome work here 👍

- ✓ You have described the 3 agile frameworks (scrum, kanban, xp) and their features which is awesome and has also chosen a specific framework (SCRUM) which will be more effective for worldvisitz.
- ✓ You have explained how the specific Agile framework (SCRUM) can be used to solve the identified problems for WorldVisitz.

#### Useful Reading Materials

1. [What are the Different Types of Agile Methodologies?](#)
2. [History and Example of Agile Frameworks](#)
3. [Which Agile Framework is Best?](#)

## Agile Practices

A ceremony schedule with an agenda for each ceremony is included in the Agile Onboarding presentation.

Ceremonies are consistent with best practices for the recommended framework in terms of agenda, frequency, duration and purpose.

## Nicely done!!!

- ✓ You have provided ceremonies schedule that are consistent with best practices for the recommended framework in terms of agenda, frequency, duration and purpose.

### Ceremony Schedule

Scrum Ceremony	Purpose	Agenda	Schedule and Frequency
Retrospective	Scrum Team inspects itself and creates a plan for improvements	Discuss what went well during the Sprint as well as opportunities for improvement	Occurrence: once per sprint Time-boxed to 3 hours per sprint
Project Vision	Articulate the business need that is intended to be achieved	Discuss Goals, Sponsor, Vision, Success Criteria, Assumptions & Risks	Occurrence: once per project Time-boxed to 1 hour
Release Planning	Develop a Plan that defines when sets of functionality or products will be delivered to the customer	Discuss critical dates and milestones, coordinate with dependent systems and balance business value versus quality	Occurrence: once per Release after initial creation Time-boxed to 20 minutes

### Ceremony Schedule

Scrum Ceremony	Purpose	Agenda	Schedule and Frequency
Sprint Planning	Plan work to be performed in the Sprint	Create Sprint Backlog Task planning Task level estimation	Occurrence: a few times per Sprint Time-boxed to 8 hours per Sprint
Daily Stand-Up	Synchronize activities and create a plan for the next 24 hours	Each team member answers 3 questions: What did I <u>do</u> since the last time we met?  What do I plan to accomplish today?	Held daily  Time-boxed to 15 minutes

		What impediments am I encountering?	
Sprint Review and Demo	Demonstrate product and discuss marketplace changes and backlog	Team presents completed Sprint deliverables to Product Owner, based on Acceptance Criteria and Definition of Done	Occurrence: once per Sprint Time-boxed to 4 hours per Sprint

At least two Information Radiators are identified.

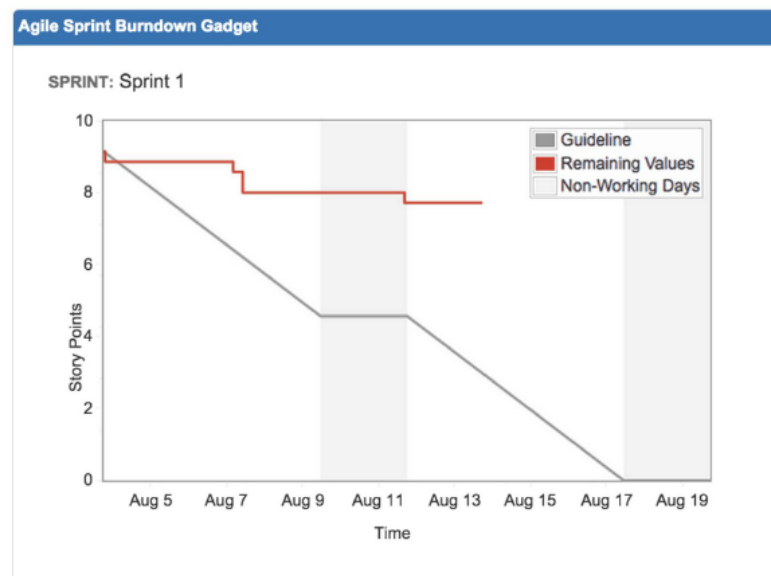

All Information Radiators include a visual example and use appropriate metrics to improve communication both across the team, as well as with other stakeholders.

For value proposition of each Information Radiator, at least one benefit is covered.

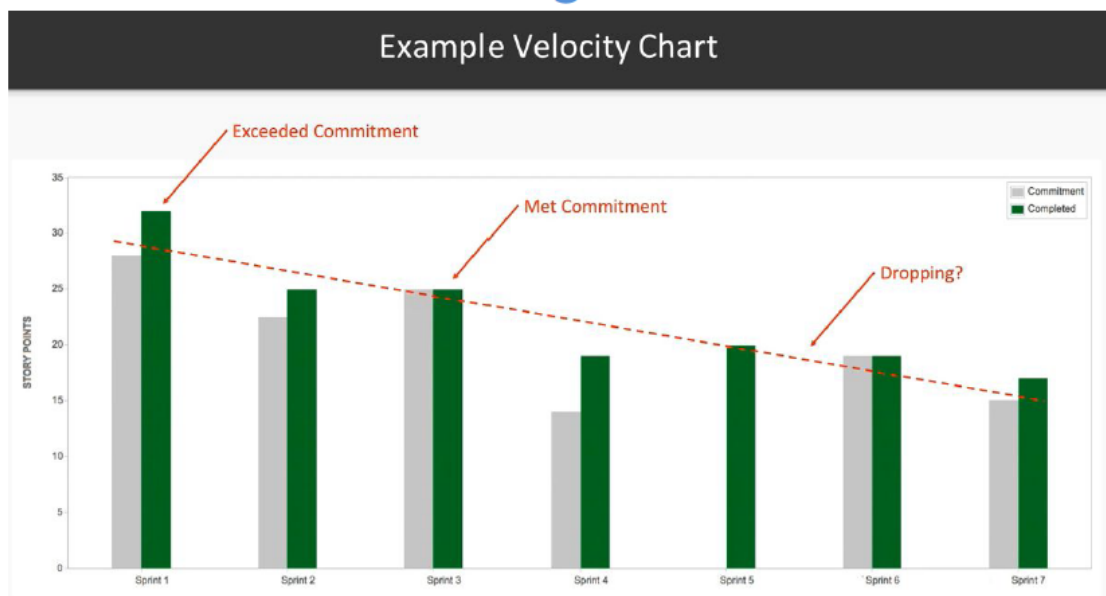

## Great Work!!!

- ✓ You have accurately provided at least two Information Radiators and included visual examples and use appropriate metrics to improve communication both across the team, as well as with other stakeholders.

## Burndown Chart

## Velocity Chart

#### Useful Further Readings

## High Performing Agile Teams

The Agile Onboarding presentation summarizes the benefits of Agile for WorldVisitz.

The presentation contains no more than 20 slides.

### Great Work!!!

-  The benefits of agile summarized in the agile onboarding document.

A minimum of 5 skill gaps, current weaknesses and antipatterns are identified for the team in the "Personal Notes" section of the "Agile Onboarding" presentation.

### Excellent job 🙌

-  You have accurately identified at least 5 skill gaps, current weaknesses and antipatterns identified for the Worldvisitz team.

#### Extra Learning

- [Steps to Identifying the Skills Gaps in Your Organisation](#)
- [Common AntiPatterns](#)

The "Personal Notes" section of the "Agile Onboarding" presentation includes a recommended training and coaching plan.

The training plan addresses the identified skill gaps, weaknesses and anti-patterns using whole Team Coaching and/or one-on-one coaching.

### Good Job!!!

-  You have correctly provided a recommended training and coaching plan. The training plan addresses the identified skill gaps, weaknesses and anti-patterns using whole Team Coaching and/or one-on-one coaching.

#### Useful Reading Materials on Training methods

1. [Agile Mastery - The Dreyfus Model in practice](#)
2. [Shu-Ha-Ri of Professional Coaching](#)

The Agile Onboarding presentation includes a list of all necessary roles based on the recommended framework.

All team members are assigned to a role that uses each team member's skill set (including current title and soft skills).

Scrum, Kanban and XP standards are followed.

## Great Job 👍

-  All team members are assigned to a role that uses each team member's skill set (including current title and soft skills). Scrum, Kanban and XP standards are followed.
